

**Amendments to the Specification**

Please substitute the paragraphs presented below with the paragraphs in the specification bearing the same paragraph numbers:

[00085] In Fig. 6, the global memory segment 42 is shown to contain the mutex 43, and in particular, the global mutex data record 400, which contains the global wait ~~link~~ queue 410 that links to one or more suspended nodes 414, 416, and 418.
